HEXFET® Power MOSFET

- Advanced Process Technology
- Dynamic dv/dt Rating
- 175°C Operating Temperature
- Fast Switching
- Fully Avalanche Rated
- Ease of Paralleling
- Simple Drive Requirements
- Lead-Free

|                           |
|---------------------------|
| $V_{DS} = 200V$           |
| $R_{DS(on)} = 0.04\Omega$ |
| $I_D = 50A$               |

## Description

Fifth Generation HEXFETs from International Rectifier utilize advanced processing techniques to achieve extremely low on-resistance per silicon area. This benefit, combined with the fast switching speed and ruggedized device design that HEXFET Power MOSFETs are well known for, provides the designer with an extremely efficient and reliable device for use in a wide variety of applications.

The TO-247 package is preferred for commercial-industrial applications where higher power levels preclude the use of TO-220 devices. The TO-247 is similar but superior to the earlier TO-218 package because of its isolated mounting hole.

## Absolute Maximum Ratings

|                           | Parameter  | Max.               | Units |
|---------------------------|--|--------------------|-------|
| $I_D @ T_C = 25^\circ C$  | Continuous Drain Current, $V_{GS} @ 10V$         | 50                 | A     |
| $I_D @ T_C = 100^\circ C$ | Continuous Drain Current, $V_{GS} @ 10V$         | 35                 |       |
| $I_{DM}$                  | Pulsed Drain Current ①                           | 200                |       |
| $P_D @ T_C = 25^\circ C$  | Power Dissipation                                | 300                | W     |
|                           | Linear Derating Factor                           | 2.0                | W/°C  |
| $V_{GS}$                  | Gate-to-Source Voltage                           | $\pm 20$           | V     |
| $E_{AS}$                  | Single Pulse Avalanche Energy②                   | 560                | mJ    |
| $I_{AR}$                  | Avalanche Current①                               | 50                 | A     |
| $E_{AR}$                  | Repetitive Avalanche Energy①                     | 30                 | mJ    |
| dv/dt                     | Peak Diode Recovery dv/dt ③                      | 10                 | V/ns  |
| $T_J$                     | Operating Junction and Storage Temperature Range | -55 to +175        | °C    |
| $T_{STG}$                 |  |                    |       |
|                           |  |                    |       |
|                           | Mounting torque, 6-32 or M3 screw                | 10 lbf•in (1.1N•m) |       |

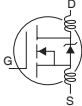

## Thermal Resistance

|                 | Parameter                           | Typ. | Max. | Units |
|-----------------|-------------------------------------|------|------|-------|
| $R_{\theta JC}$ | Junction-to-Case                    | —    | 0.50 | °C/W  |
| $R_{\theta CS}$ | Case-to-Sink, Flat, Greased Surface | 0.24 | —    |       |
| $R_{\theta JA}$ | Junction-to-Ambient                 | —    | 40   |       |
