## Features:

- Universal AC input / Full range (up to 305VAC)
- Built-in active PFC function
- High efficiency up to $90.5 \%$
- Protections: Short circuit / Over current / Over voltage / Over temperature
- Cooling by free air convection
- Fully isolated plastic case
- Fully encapsulated with IP67 level (Note.6)
- Class II power unit, no FG
- Class 2 power unit
- Built-in 3 in 1 dimming function (1~10Vdc or PWM signal or resistance)
- Suitable for LED lighting and moving sign applications
- Compliance to worldwide safety regulations for lighting
- Suitable for dry / damp / wet locations
- 5 years warranty

| NOTE | 1. All parameters NOT specially mentioned are measured at 230 VAC input, rated load and $25^{\circ} \mathrm{C}$ of ambient temperature. <br> 2. Ripple \& noise are measured at 20 MHz of bandwidth by using a $12^{\prime \prime}$ twisted pair-wire terminated with a 0.1 uf $\& 47$ uf parallel capacitor. <br> 3. Tolerance : includes set up tolerance, line regulation and load regulation. <br> 4. Please refer to "DRIVING METHODS OF LED MODULE". <br> 5. Derating may be needed under low input voltages. Please check the static characteristics for more details. <br> 6. Suitable for indoor use or outdoor use without direct sunlight exposure. Please avoid immerse in the water over 30 minutes. <br> 7. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time. <br> 8. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. <br> 9. Direct connecting to LEDs is suggested, but is not suitable for using additional drivers. <br> 10. To fulfill requirements of the latest ErP regulation for lighting fixtures, this LED power supply can only be used behind a switch without permanently connected to the mains. |  |  |  |  |  |  |  |  |

## Power Factor Characteristic

- EFFICIENCY vs LOAD (48V Model)

LPF-90D series possess superior working efficiency that up to $90.5 \%$ can be reached in field applications.

LOAD
DRIVING METHODS OF LED MODULE

This LED power supply is suggested to work in constant current mode area (CC) to drive the LEDs.

## DIMMING OPERATION

※ Built-in 3 in 1 dimming function, IP67 rated. Output constant current level can be adjusted through output cable by connecting a resistance or $1 \sim 10 \mathrm{Vdc}$ or 10 V PWM signal between DIM+ and DIM-
※ Please DO NOT connect "DIM-" to "-V"

※ Using the built-in dimming function on LPF-90D can't turn the lighting fixture totally dark. Please refer to the connection method below to achieve $0 \%$ brightness of the lighting fixture connecting to the LED power supply unit.

Dimming connection diagram for turning the lighting fixture ON/OFF :

Using a switch and relay can turn ON/OFF the lighting fixture.

1. Output constant current level can be adjusted through output cable by connecting a resistor or 1~10Vdc or 10V PWM signal between DIM+ and DIM-.
2.The LED lighting fixture can be turned ON/OFF by the switch.
