

PXIS-2630

8-Slot 3U PXI/CompactPCI Chassis with 400 W AC Power Supply

Introduction

Prepared for rugged mobility, the ADLINK PXIS-2630 series is a 3U PXI chassis with one system slot and seven peripheral slots. The chassis is compliant with PXI and CompactPCI specifications and accepts both PXI and CompactPCI modules. The PXIS-2630 integrates all PXI features, including a 10 MHz reference clock, start trigger, local bus, and trigger bus.

Reliable power is supplied to the PXIS-2630 chassis by an industrial-grade 400 W AC power supply. The status of system power supplies, temperature, and fan operations are monitored by a chassis-integrated alarm module. When a failure is detected, the corresponding LED lights up and the buzzer sounds an alarm. Designed with hot-swappable fan trays, any defective fan may be removed and replaced from the front panel even when the system is running, ensuring uninterrupted operation and reduced MTTR (Mean-Time-To-Repair). The PXIS-2630 chassis is the best alternative for all your PXI applications.
